

# QUANTUM RELIEF STRIPS

**ENERGIZED SILK STRIPS  
FROM KOREA**

**WORKS WITH THE BODY'S CHI**

**BALANCES ENERGY**

**BRINGS ENERGY TO  
PROBLEM AREAS**

**RELIEVES NEGATIVE ENERGY**

The idea of an energy-driven life force in the body, or Chi, has been around since the ancient Chinese. The basic idea is that Chi helps the body with its natural functions - things like blood flow, digestion, body heat, and your immune system. So in essence, healthy Chi equals healthy body.

There are lots of things out there that can hurt your Chi, and thus, your body - things like pain, sickness, and stress. When those inevitable things happen in our lives, Quantum Relief Strips are here to help heal your Chi.

**Active Ingredient:** Quantum Energy

**Inactive Ingredients:** Ginger, Tourmaline, Silk, Adhesive

Recommended for adults 18+ years old.

**Directions for use:**

Apply strip to area where Quantum Relief is wanted.

Effective for two days.

**How do they do this?**

Since Chi is energy-driven, you need energy to to heal it. That's why in our Quantum Relief Strips we use a mineral called tourmaline, one of the most energy-conductive crystals on earth. We charge these crystals with energy and they release that energy into your body when the strip is applied, replenishing your Chi in areas where the energy has been depleted.

Healthy Chi, healthy body, and happy YOU!

# HOW QUANTUM ENERGY IS INFUSED INTO QUANTUM RELIEF STRIPS

The Quantum Relief Strips consist of a flat plate, a quantum energy generator, and a wave energy memory layer. The process works by which a predetermined frequency band is memorized by resonating the wave energy using the wave energy memory layer.

## THEORY BEHIND THE STRIPS

Every material has its own wave energy, or information energy field. It continues to flow and maintains the health of each tissue and organ.

If any part of the body does not have such a wave energy it is stagnant, or considered bad. When modulated by wave energy, blood circulation at that site is not smooth, and blood circulation is reduced.

Leukocytes (especially immune cells) become deficient, and this reduction in immunity results in disease. Thus, if a disease occurs due to lack of wave energy in a specific region of the human body, the disease can be improved by supplementing the wave energy - if the disease is caused by the unbalance of the wave energy. By neutralizing the imbalance, the disease can be improved.

## THEORY INTO PRACTICE

Therefore, in order to solve the shortage or imbalance of the wave energy, we resonate the wave energy using a quantum energy generator to memorize a predetermined frequency band. The frequency band of the Quantum Relief Strips is characterized by being selected from the group consisting of 1,100 MHz or more, 400 to 450 MHz, 200 to 250 MHz and 100 to 160 MHz.

Atoms are composed of protons, molecules composed of atoms, cells composed of molecules, and tissues composed of cells, organs composed of tissue. As a result, there is a unique quantum energy field in each of the organs composed of tissues and cells.

After the examination of quantum energy, it was discovered that it is similar to that energy emitted

by the human body. Using this energy, various biological tissues can lead to a strong physiological effect, that is, depending on the frequency information.

Some frequencies may be beneficial to the living body, while others may be harmful to the living body. It is possible, therefore, that by using a device for generating quantum energy (wave energy), having the above-mentioned information, a predetermined frequency band such as 400 to 450 MHz, 200 to 250 MHz, and 100 to 160 MHz, that Quantum Relief Strips can be memorized and contacted with the body.

By exposing the human body to the wave energy that is radiated there, it neutralizes the quantum energy that compensates for the imperfect quantum energy or imbalances the specific part of the body.

## ABOUT THE MACHINERY

The quantum energy generator uses a Tesla coil, which the famous inventor Nikola Tesla invented and used. Two coils were used to develop a new energy wave that could be transmitted. One turns to the right and the other to the left, and the direction of the current also flows in the opposite direction, so that the two magnetic fields cancel each other and the magnetic field becomes zero.

These Tesla coils are also called self-destructive coils or "non-inductive toroid coils." The new energy waves generated by these coils are called non-Hertzian waves. This is the basic principle of the quantum energy generator we have developed.
